

Veritas SaaS Backup

A cloud-to-cloud backup solution with secure and automated data protection across SaaS-based workloads.

TAKE CHARGE OF YOUR DATA WITH A SIMPLE CLICK

In the digital era, organizations are being driven to adopt modern technologies and IT Services such as SaaS for the flexibility and scale benefits, but this presents other challenges. When it comes to your business-critical data in the cloud, do you know what your organization is responsible for protecting versus your SaaS application vendor? You are responsible for your data, users and compliance, while your SaaS application vendor is only responsible for keeping the SaaS application up and running.

Veritas™ SaaS Backup helps bridge the gap by providing secure and scalable data protection across your entire Office 365 or Salesforce environment and beyond. It is designed for today's technologies and today's mobile workforce and organizations of all sizes. Protect SaaS productivity applications with the ability to access anywhere, anytime, and from any device, and instantly restore data with a single click.

SOLUTION HIGHLIGHTS

- **Unified data protection across multiple SaaS applications.**

Central management from one console with complete data protection for Office 365 or Salesforce. Automatically scheduled backups with up to 6 backups a day.

- **Simple, easy, and hassle-free—save on time and costs.**

Easy 3 step setup process gets you up and running in minutes. Simple and intuitive console to view backups and recover data with a click. Access the service anywhere, anytime and from any device. Save on costs - no hardware to purchase, no software to install or deploy, no extra physical space or dedicated IT specialist needed, no maintenance and version upgrades that need to be managed overtime.

- **Future proof scale out capabilities.**

Future proof your SaaS workload data protection strategy to meet the needs of any size organization. Automatically add and remove users to backup or easily select individuals or groups to manage. Unlimited storage capacity. Retain data of both active and inactive users without paying for licenses of departed employees.

- **Quickly find and restore data at any level with improved RPO and RTO.**

Recover all tenant account data at once or an individual mailbox, folder or file.

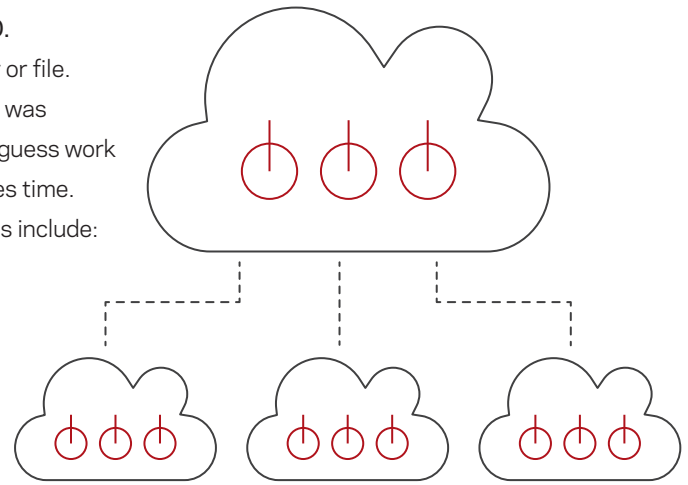

Identify and instantly recover the exact file, at the exact point in time it was backed up. Preview files before actually restoring them to remove the guess work and help you quickly find the right data to restore which ultimately saves time.

Multiple restore options that provides choice and convenience – options include: shared links to file, direct download and in-place restore.

- **99.9% uptime with our secure and reliable service.**

Data redundancy of 4 copies that stay within the same region.

Data encrypted in-flight with TLS 1.2 and at rest with 256-bit AES.
